TERMS OF SALE

2% for cash with order

or 2% 10 days, 30 days net for established accounts.

Unless otherwise specified, Bulbs will be shipped when dug in the Fall. Approximate earliest delivery date is indicated for each variety.

We will accept orders for spring delivery provided they reach us not later than December 1. Spring orders will be placed in cold storage and shipped as directed at no extra cost until April 1. After April 1 a nominal charge will be made for storage.

All Bulb prices are F.O.B. Lake Grove, Oregon, and are subject to change without notice.

Our wholesale price lists are intended for the trade only. Kindly do not hand them to amateur growers.

In ordering please specify whether shipment is wanted via parcel post, express, or freight. If wanted by post kindly include postage with remittance.

In shipments of 100 pounds or more we find air freight rates to the principal cities cheaper than railway express or equivalent to motor freight rates. In many instances this may be your cheapest and fastest means of delivery.

Orders for growing crops accepted subject to crop failures, shortages, or other matters beyond our control.

Any claims for shortages or errors must be made within five days after receipt of goods as we will not be responsible after that time. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter in connection with the success of the seeds, bulbs or plants sold by us and will not be responsible in any way in cases of failure, other than to replace bulbs untrue to name. If the purchaser does not accept the goods on these terms, they are to be returned at once.

QUANTITY RATES ON LILY AND MISCELLANEOUS BULBS

25 Bulbs one variety and size at 100 rate.

250 Bulbs one variety and size at 100 rate less 10%.

Wholesale orders cannot be accepted for less than five bulbs of one variety and size except on items priced per each. Where so priced 1 to 25 bulbs will be supplied at the each price, 25 or more at single bulb price less 10%.

Flowering size indicates bulbs which will have flowered at least one season in our nursery. Large or 1st size bulbs are top size for the particular variety.

In compiling this list of northwest grown lilies we have added several varieties of which we have ample stock to offer this season. In addition we grow moderate quantities of a number of other varieties and welcome inquiries concerning any which are commercially available at the present time.

In the following price list we have endeavored to briefly describe all of the stock offered by indicating flower type and size, color, height (maximum average for mature established bulbs) and flowering period under Northwest climatic conditions.

HIGHEST AWARD

LILIES

For Garden and Greenhouse

In presenting our 1957 Trade price list to the horticultural Trade, we are again fortunate to be able to offer the most complete selection of lily species and Hybrids available from Pacific Northwest grown stocks. The increased interest in Lilies as garden subjects in recent years has been most encouraging and reports of success with stock shipped by us from such distant points as Alaska to Florida on the North American continent and from many foreign countries leads us to believe that Northwest grown bulbs, dug and shipped at the proper time in the fall season will give entire satisfaction anywhere that lilies can conceivably be grown. In response to many requests we have prepared a leaflet of "Basic Lily Culture," copy of which is enclosed. We trust that this publication will assist the Trade in answering the many cultural questions asked of them by their retail customers. Additional copies of this pamphlet may be secured as noted in the paragraph of Sales Aids. The demand for the rare and unusual in species lilies continues to increase and we are pleased to offer several additions to our former lists this season. Among these will be found a very complete group of our Western American species including bulbs of *L. Bolanderi*, *Columbianum* *Ingrami*, *Kelloggii*, *Occidentale*, *Vollmeri*, *Washingtonianum* *Purpureum*, and *Wigginsii* in addition to several previously listed. We have also added to our stocks of Asiatic and European species and expect to continue to expand this collection as time goes on. The interest in Hybrid Lilies goes on unabated as it has for the past decade. We are pleased to offer several new clones and strains this season and a new simplified classification of the ever popular Aurelian group. This, along with several new hybrids and species not previously offered, is described briefly below. Prices of this stock are contained in our general list.

L. AURELIAN HYBRIDS—Flower Types contained in this group comprise three distinct forms as follows:

CORONAS—Reflexed or recurved in varying degrees. Petals of medium width. Moderately tall plants producing flower heads excellent for cutting as well as garden decoration.

FLARES—Large, wide flaring flowers intermediate in form between Trumpet and Recurved. A very distinct flower type with a brilliant color range.

TRUMPETS—True Trumpet shaped flowers on medium to tall stems. The flowers are large and of heavy texture.

The above three Types are subdivided into select color strains as offered in our list. The color strains are carefully selected at flowering time to eliminate any off colors or inferior blooms.

In addition we offer several select clones in the Aurelian group and a strain of special select semi-bowl and semi-recurved types in pastel colors.

1957 INTRODUCTIONS

L. DOMINION HYBRIDS—A new strain of lilies derived from stocks developed by Dr. E. F. Palmer. The original cross was made with an upright form of *Henryi* and a semi-trumpet nearly white *Aurelian* seedling. This is a balanced mixture of selected clones in pastel colors of light buff and apricot to creamy white. The large flowers are flat opening, lightly recurved at the petal tips, their excellent texture makes them very long lasting as cut flowers as well as for garden display. The plants are uniformly upright growers attaining a height of from 5 to 6 feet and when established will carry from eighteen to forty buds with as many as ten to fifteen open at once. Secondary buds are produced which prolong the flowering season from early July well into August.

L. GOLDEN HARVEST HYBRID "GOLDEN NUGGET"—A very vigorous selection, the heavy stems growing to a height of 6 to 8 feet. The large, recurved flowers are produced in profusion—25 or more on established plants—and are lemon yellow lightly dotted reddish brown. The throat is sap green. One of the best true yellows we have found in this type of material. Late July and August flowering.

L. KING WILLIAM—An erect stately plant from crosses made by Dr. E. F. Palmer involving the complex hybridizing of (*Croceum* x *Umbellatum* Mahogany x *Tigrinum*) x (*Coronation* x *Brenda Watts*). The semi-recurved flowers are of a bright bittersweet color, spotted mahogany and are outward facing. The stems rise 5 to 6 feet and carry a remarkable head of flowers, forty or more not being unusual. This lily has a very long season of bloom, lasting the entire month of July. Of easiest culture in a variety of soil conditions but best grown in a sunny situation.

L. SPECIOSUM MAGNIFICUM DARKEST RED SELECTIONS—(*Melpomene* Type) A selected strain with dark crimson flowers edged white, approaching the true *Melpomene* in coloring. Far superior to usual stock offered as *Melpomene*. Same flowering time and height as *Magnificum*.

L. WIGGINSII—A rare Pacific Coast native, probably the same as the lily originally offered by Mr. Carl Purdy as *L. roezlii* (yellow). Recurved yellow flowers somewhat larger than columbianum with which it has been confused. Purple or mahogany spots. Height 2 to 3 feet. Flowering early July. A true swamp lily in its native habitat in southern Oregon and northern California.

SALES AIDS

Our "Reference Chart of Lilies for Garden and Greenhouse" contains over 2000 items of cultural information covering most of the commercial lilies and is available at \$1.25 postpaid. On request we are prepared to quote quantity prices on the chart for resale. A number of our customers are offering this along with their catalogue listing lilies.

"Basic Lily Culture," our new pamphlet of information for both the novice and experienced grower, is designed to answer the questions most usually asked concerning the successful cultivation of hardy lilies and is based on over 25 years experience with the genus. A copy will be included with each 1957 catalogue and with each Reference Chart when requested. Additional copies may be secured at a cost of 10 cents each in any quantity up to 100. We will be pleased to quote prices on larger quantities upon request. We feel that it will be of material benefit to the Trade to include these instructions with all retail lily orders, particularly to customers who have had limited or no experience in Lily culture. A successful beginning will most likely assure repeat orders in future years.

"Hardy Cyclamen Culture," a leaflet of complete instructions on growing these popular plants is free to the Trade. A copy will be included with all cyclamen orders. Quantity orders for this publication will be supplied at cost. Prices on application.

As mentioned in our previous Trade lists, we now have available a new set of color transparencies for lecture and sales aid use. This set has been expanded during the past years and the list now includes over 250 subjects from which to choose. These photographs can be supplied as slides (2 x 2), enlarged transparencies in sizes 2¼ x 3¼ and larger or as color prints. A complete list of subjects available and details of their cost will be sent promptly upon request. In corresponding kindly advise whether slides, enlarged transparencies or prints are needed and approximate quantity.

L. Centifolium, Temple Hybrids—A vastly improved strain of Centifolium Hybrids produced after many years of selective hybridizing. Offered only in color stains of selected plants (not clones) which are marked separately during the flowering season each year. The following color strains are available for the present shipping season :

Amethyst Temple—Massive trumpets varying in color from light amethyst pink to deep columbine red. The pink coloring is on the interior as well as the reverse of the petals. Splendid for cutting or in the garden. In warm sections, planting in light shade is preferable to avoid bleaching. 5 to 7 feet. July.

6- 8".....	18.75	150.00	Oct.
8-10".....	23.75	190.00	Oct.

Marble Temple—The predominant color of this strain is lustrous pure white, ivory, or pearly white. The varying tones of white with the exterior markings resemble the colors seen in the finest marble. The large trumpets vary in external color from bronze, light yellow and green to brownish purple with yellow, green or pure white throats. 5 to 7 feet. July.
